

Capita Methodology in Determining Creditworthiness of Counterparties:

Capita's creditworthiness service employs a sophisticated modelling approach with credit ratings from all three rating agencies - Fitch, Moodys and Standard and Poors, forming the core element. However, it does not rely solely on the current credit ratings of counterparties but also uses the following as overlays:

- credit watches and credit outlooks from credit rating agencies
- Credit Default Swap [CDS] spreads to give early warning of likely changes in credit ratings and gauge a market view of the counterparty
- sovereign ratings to select counterparties from only the most creditworthy countries

Capita's modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which the end product is a series of colour code bands which indicate the relative creditworthiness of counterparties. These colour codes are used to determine the maximum duration for deposits and are therefore referred to as durational bands. This approach gives a much improved level of security for its deposits. The table below also shows the current limits for deposits with any bank or group of banks which is £2m except for the Councils own bank, HSBC, which has an individual limit of £15m and other named institutions below (£4m) .
